General Information
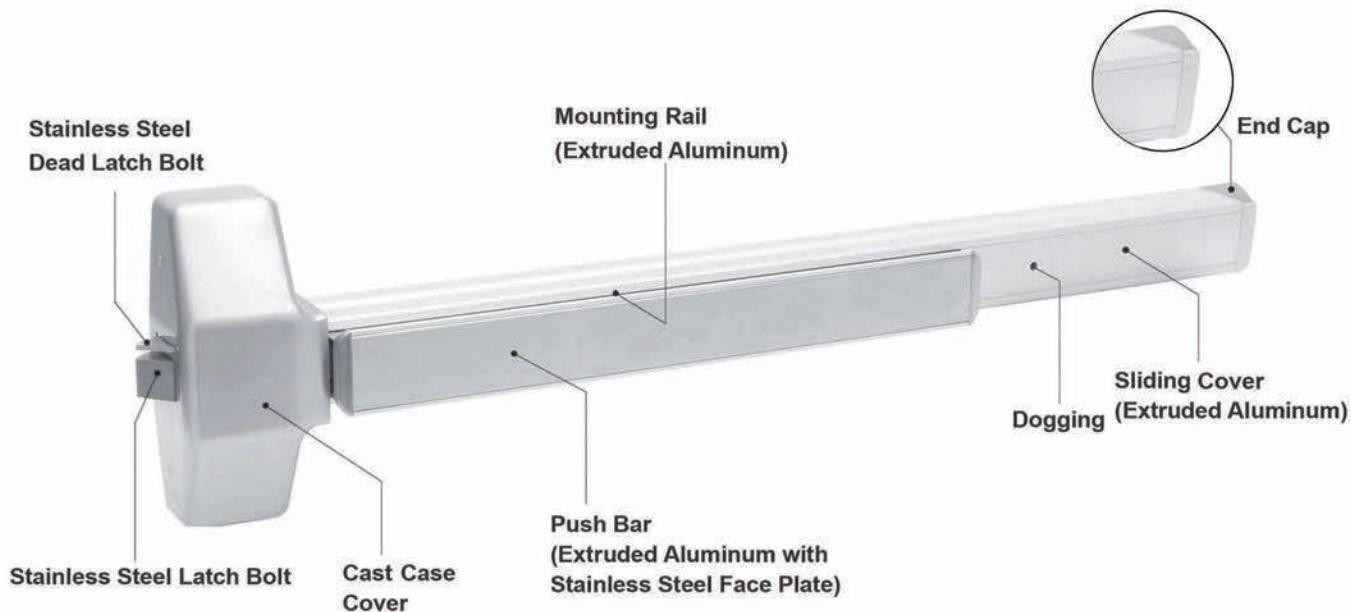

Stainless Steel Dead Latch Bolt

Mounting Rail (Extruded Aluminum)

End Cap

Sliding Cover (Extruded Aluminum)

Dogging

Stainless Steel Latch Bolt

Cast Case Cover

**Push Bar (Extruded Aluminum with Stainless Steel Face Plate)**

Features

- All devices are non-handed or reversible design.
- UL Listed for Fire Exit hardware, 3 hours.
- High shock-resistant latching mechanical design for vandalism protection.
- "A" Label (3 hr) rating on pairs of doors up to 8' x 8' for same or double egress.
- All internal components are made of electro-plated corrosion-resistant alloy.

Electronic Locks

2000 Series

2000 Series is a standalone electronic function lock that provides keypad technology integrated with an ANSI Grade 1 heavy duty lockset for greater security. Keypad technology simplifies the management of the system and provides ease of use. Maximum code capacity includes 1 master code, 100 user codes, and 5 service codes. The 2000 Series is quick and easy to program.

Electronic Specifications

Application	Full indoor and outdoor
User codes	Up to 100
Communication	Multi-colored LED and Sound
Power supply	4AA Alkaline batteries
Battery life	Up to 2 years
Operating Temperature	-31 ° F to 151 ° F (-35°C to 66°C)
Certifications	FCC Part 15

Programming Features

- 12-key push button illuminated
- Code length: 4-6 digits
- 100 pin codes capacity

Series 5000 BLE
Mobile application & BLE Series Locks

General Information

Electronic credentials simplify managing keys and eliminate the need to re-key locks by allowing the owner to provide a unique credential to authorized users that can be deleted and replaced if lost.

Smart credentials (13.56 MHz)

- MIFARE® S50 EV1 1k
- MIFARE® S70 EV1 4k
- PIN Codes (6-10 digits)
- Up to 400 codes or keycards

Features

TSE Home mobile app

- Add new locks or devices
- Configure lock and device settings*
- Add new user codes*
- Assign users to each credential
- Manage users and assign privileges
- View and export audits*
- Receive notifications and updates*
- Manage device firmware updates*
- Configure lock and device settings*
- Unlock the door wirelessly*

* Completed within 20 feet of the lock

Technology recommendations

Apple iOS

- Apple iOS 13 & higher
- iPhone 8 or newer

Android

- Android 10.0 & higher
- A device from a major manufacturer is recommended
  - Google Nexus 6 or newer, Pixel or newer
  - HTC One m9
  - Samsung S6 or newer

General Information

The TSE Home mobile application simplifies the ability to connect users to their locks and provides the power to manage access. The user can use their compatible bluetooth mobile device to conveniently and securely access assigned rooms. View activity logs of your property and be aware when batteries need to be changed.

With the TSE Home mobile app, it's easy to configure settings, manage users, add and delete credentials, and view activity log. Updates to configuration and access privileges can be sent to the device using the TSE Home mobile app.

General Information

The TSE Home mobile application simplifies the ability to connect users to their locks and provides the power to manage access. Grant a temporary guest key, view the activity log and stay aware when batteries need to be changed.

In order to operate the locks you will require a Gateway. The Gateway sends and receives data stream from your Phone/APP (Remotely) via the Internet Router in your property and converts it into RF signals to communicate with the Series 5000 Wi-Fi Lock.

With the TSE Home mobile app, it's easy to configure settings, manage users, assign access privileges, add and delete credentials, and view activity log and alerts. Updates to configuration and access privileges can be sent to the lock remotely.

General Information

Electronic credentials simplify managing keys and eliminate the need to re-key locks by allowing the owner to provide a unique credential to authorized users that can be deleted and replaced if lost.

Smart credentials (13.56 MHz)

TownSteel Maxx Access System

Overview

Maxx Access System management software provides a comprehensive cost-effective and access control solution for properties. Whether you are managing apartments, privatized student housing or senior living facilities, TownSteel now offers a centralized interface to manage all aspects of property access control from individual living spaces to property perimeter and elevator control.

This offline Windows®-based system designed by TownSteel for enhanced user experience and security, offers centralized administration and control of sites scalable to your needs. Some of the system's top features impacting multi-housing and hotels can tailor access privileges to staff or guests quickly and easily using the intuitive, user-friendly software. Single-door architecture makes specifying, installing, and maintaining the system secure yet straightforward. Advanced features include integrated access control and elevator control. Plus, you can quickly generate multi-activity reports in a few clicks. It is compatible with all TownSteel 6000 series locks such as the e-Kestros, e-Kontos, e-Genius, e-Elite, e-Trident and e-Cronus.

- Create user profiles to secure system access.

- Facilitates replacement of lost cards.

- Common and restricted area management through credential or scheduled access.

- View, save or print reports

- Supports multi-room access with one key.

- Securely programs and encodes credentials and accessories.
