

AegisSync Lock Series

**Smarter.
More Secure.
No Recurring Fees.**

I-Sync shown in photo.

AEGISSYNC™ · POWERED BY AEGISSECURE™ · TOWNSTEEL

It's time to upgrade your old locks to AegisSync.

- **No recurring fees. Ever.**
AegisSecure is a one-time license. That means no cloud charges, no subscriptions, and no annual renewals.
- **Retrofit and new installation. Minimal hassle.**
Minimal to no door modifications required, ideal for retrofit applications.
- **Familiar key fob feel. Zero retraining necessary.**
Key-shaped RFID fob works exactly like a traditional key. Residents and staff adapt instantly.

AegisSync products are code compliant & pending certifications:

Part of the Rejuvenator 2.0 Series

Why carry AegisSync?

Engineered for multihousing properties upgrading from discontinued legacy access control.

Product Overview: I-Sync & D-Sync

I-Sync
Interconnected lock that integrates with AegisSecure for remote credential management and full audit trail access.

D-Sync
Heavy-duty standalone deadbolt for unit entries, common areas, and amenity spaces. Traditional thumbturn operation, AegisSecure-managed.

AegisSync vs. Legacy Platform

AegisSync™ with AegisSecure™	Discontinued Legacy Platform
AegisSecure software is a one-time purchase and is actively supported with regular updates	Proprietary credential software is no longer supported by the original manufacturer
Dedicated distribution and partner support network with multiple ways to get new or replacement locks	Properties forced to search for third party resellers to find replacement locks or spare parts
Ongoing active product development and technical support	No vendor support and manufacturer warranties have expired
Easy replacement with the same footprint, minimal to no modifications required (model dependent)	Requires an expensive upgrade to a completely different lock set when components fail

Key Specifications

Credential Types

RFID (13.56 MHz), BLE (2.4 GHz) (model dependent)

Unlock Speed

≤1 sec at ≤½" distance

Audit Trail

Up to 2,000 entries (max database storage capacity)
